CLAIM SUMMARY DOCUMENT:

1. (Previously amended) An isolated gene encoding a protein having activity to synthesize aurones by preferentially using chalcones as substrates, wherein said gene is obtained from Scrophulariales.

Claims 2-4 (Currently canceled)

- 5. (Previously amended) An isolated gene as set forth in claim 1, which encodes an amino acid sequence having a homology of at least 55% relative to the amino acid sequence described in SEQ ID NO:2, and encodes a protein having activity to synthesize aurones by preferentially using chalcones as substrates.
 - 6. (Previously amended) A vector comprising a gene as set forth in claim 1.
- (Previously amended) A host cell transformed by a vector as set forth in claim 6.
- (Previously amended) A host cell as set forth in claim 7, wherein said host cell is a microorganism or animal cell.
